

Noise in Iceland – Current situations and challenges

Ólafsson Gunnar Alexander ¹.

¹Department for Sustainability, Environmental Agency Iceland.

- Law regarding Noise. In Icelandic we say: „Með lögum skal land byggja“, which means by law, land shall be built. Why do we need law regarding noise?
- Regulations regarding noise. Specific measurements to prevent noise and protect population from disturbance and annoyance from noise.
- The need for noise control and noise limitation.
- Noise and health consequences.
- Noise mapping – Case of Iceland
- Noise and traffic. High use of winter and studded tires.
- High portion of cars own by individual and low use among population regarding public transport
- Noise and airport. Keflavik airport and Reykjavik Airport.
- Noise and industry.
- Challenges – New method regarding measuring noise. Cnossos instead of NORD2000
